OBJECTIVE

Motivated first-year Computer Science engineering student with basic knowledge of Python and C. Seeking an internship to apply my learning, gain practical exposure, and grow my technical skills by contributing to real projects. A quick learner with a strong interest in problem-solving and a willingness to take on new challenges.

EDUCATION

P E S College — Mandya
Bachelor of Engineering in Computer Science — *September 2026 - Present*

Bharathi Composite PU College — Mandya
Science (PCMB) — *June 2024–August 2026*
Percentage-92.3

PROJECTS

AI Chatbot | *Zapier Chatbots, Prompt Design* — November 2026

- Built and deployed a live AI chatbot using Zapier, configuring its instructions and responses so it answers user questions clearly and consistently.
- Published it as a public web app that anyone can open and use through a single link: chat-bot-ai-782b43.zapier.app

Personal Portfolio Website | *HTML, CSS, JavaScript, Git, GitHub* — November 2026

- Problem: A resume alone gives recruiters no way to see skills in action — students need a live, accessible web presence that demonstrates real front-end ability rather than just listing it.
- Designed and built a fully responsive single-page portfolio from scratch — semantic HTML5, hand-written CSS3 using Grid, Flexbox, and custom properties — with dark/light themes that follow the system setting, with no frameworks or templates.
- Implemented interactivity in vanilla JavaScript — a theme toggle persisted with localStorage and copy-to-clipboard contact details — and deployed through the full Git workflow (init → commit → push) to GitHub Pages for free live hosting.

TECHNICAL SKILLS

Programming : Python, C (basic)
Web & UI : HTML, CSS
AI Tools : Claude, ChatGPT, Gemini
Tools & Platforms : VS Code, Git, GitHub, Zapier
